

## **Outpatient Prescriber Rate Increase: CORRECTION**

**This Bulletin is being issued as a correction to the original.**

The original message of Bulletin 18-22 still applies and is as follows:

CBH acknowledges that providers across the United States are facing challenges in their ability to recruit psychiatrists to fill a critical role at their agencies. This lack of access to psychiatric services often results in significant delays in treatment, reduced quality of care, and poor outcomes. Recognizing this challenge and need for innovative solutions, CBH will offer a 10% rate increase for all outpatient psychiatrists as of January 1, 2019 for the levels of care listed below. A 10% rate increase will also be applied to physician extenders (physician's assistants and certified registered nurse practitioners [CRNP]) for medication management.

**The initial version of Bulletin 18-22 inadvertently listed 14 levels of care that are NOT being included in this rate increase, while 1 level of care was also left off that should have been included.**

The 14 levels of care that were inadvertently included that will NOT receive the rate increase are as follows:

- 300-10 FAMILY/COUPLES PSYCHIATRIST
- 300-12 COLLATERAL FAMILY PSYCHIATRIST
- 310-51 Family Couples Therapy- Psychiatrist Adult-Contractor
- 310-52 Family Couples Therapy- Psychiatrist Child-Contractor
