

Community Behavioral Health: Provider Notification Treatment Capacity Forms January 25, 2017

On November 3, 2016 a DBHIDS/CBH Provider Bulletin (#16-06) was issued entitled Daily Psychiatric and Substance Abuse Open Bed Registry. This Bulletin indicated that the daily report of acute psychiatric inpatient bed availability will be effective as of December 5, 2016; however, on December 2, 2016, a Provider Notice followed this Bulletin to announce a webinar for the children and adolescent inpatient providers.

This Notice is to announce that all adult psychiatric inpatient and substance use providers shall begin completing the daily treatment capacity forms effective **Monday, February 20, 2017**. The providers required to complete the daily Substance Use Treatment Capacity Form include the following levels of care: medically managed and medically monitored detox programs, medically managed and medically monitored short-term rehab programs, long-term rehab programs, specialized rehab programs, and halfway houses; this does not apply to outpatient and intensive outpatient substance use programs.

CBH will conduct a webinar for the adult inpatient psychiatric providers and substance use providers. A date for the webinar, along with an invitation and web link will be forthcoming. Additionally, you will be asked to submit a primary and secondary contact for the completion of the forms. Please direct inquiries regarding this Notice to your Provider Relations representative.
