

**Community Behavioral Health: Provider Notification
Child and Adolescent Inpatient Performance Standards DRAFT: Request
for Provider Feedback
January 27, 2017**

As you are aware, CBH is endeavoring to enhance services available to children and adolescents admitted to Inpatient Psychiatric Treatment. To this end, CBH has collaborated with the Child and Adolescent Inpatient providers, as well our system partners to create Child and Adolescent Inpatient Performance Standards for providers in the CBH network based on current best practices in the field. These Standards are intended to bring uniformity and quality to inpatient treatment. CBH is very interested in feedback from providers, stakeholders, and families regarding the draft in its current stage. Please note that the Standards are currently a working document, and we will adapt it to include both provider input based on a consensus process, as well as any changes in state regulations. The Standards will also be expanded to include oversight and monitoring procedures before final publishing.

Please take a moment to read the [Child and Adolescent Inpatient Performance Standards](#) and provide your feedback via the linked survey on or before close of business February 6, 2017:
