

## **Community Behavioral Health: Provider Notification Provider Applications May 9, 2017**

CBH will be launching the new Provider Application on June 1, 2017. The Provider Application will help CBH obtain accurate information for referral and network management, thereby minimizing CBH requests for provider details throughout the year.

We recognize that completing the initial application will require some time, particularly for larger providers with multiple program service locations. We request that each provider identify a Provider Application project manager to streamline the process. This person will work closely with the assigned CBH Provider Representative to lead the initiation, execution, and ongoing monitoring of the Provider Application. Please email your Provider Representative the name and contact information for the designated Provider Application project manager by May 15, 2017. Provider Applications must be submitted by July 3, 2017.

CBH will be scheduling multiple Provider Application webinars, which will address details about the process and give providers the opportunity to ask questions. Thank you for your ongoing collaboration and communication regarding this process.
