

**Community Behavioral Health: Provider Notice
Temporary Waiver of CPR Certification Requirements for
Intensive Behavioral Health Services (IBHS) and Family-
Based/Family Rehab Services
July 28, 2020**

Effective immediately, CBH is temporarily waiving the requirement that CPR certification is required for at least 50% of individuals working in the following Levels of Care (LOC):

- IBHS
- Family-Based Services
- Family Rehabilitation Services

Providers are not required to apply for the waiver, as it automatically applies. This waiver does not apply to other LOC and does not supersede any Commonwealth requirements for CPR certification. Individuals are encouraged to continue to register for CPR classes as they become available and obtain CPR certification whenever possible.

This requirement will be waived through March 31, 2021.

Please direct any questions about this Notice to CBH.ComplianceContact@phila.gov.
