

**Provider Bulletin 20-25
November 3, 2020
(Revised November 12, 2020)**

Acute Inpatient Psychiatric Hospitalization for Pregnant Members

CBH recognizes that there are treatment challenges associated with acute inpatient psychiatric hospitalization for pregnant members. To support our providers caring for pregnant members, CBH will be offering a standard per diem rate of \$1200.00 for providers who admit a pregnant member onto their acute psychiatric inpatient unit. CBH expects that the acute inpatient hospital will provide comprehensive and integrated services to include collaboration with obstetric and pediatric providers, as well as other supports, including family and/or partner to ensure optimal care is being delivered. CBH remains committed to facilitating positive outcomes for a pregnant member experiencing a psychiatric crisis and their potential offspring.

CBH will include a new level of care on the inpatient psychiatric hospital provider's contract

- 100- 39 Inpatient Psychiatric Acute Hospital Services Pregnant Member

The CBH Clinical Care Management will generate the authorization under the new level of care. The provider will need to submit the claim with an ICD-10 pregnancy diagnostic code in order for the claim to pay.

Please direct questions regarding this Bulletin to your assigned CBH Provider Relations Representative.
