

- 1. Is this training appropriate for outpatient agencies that offer Trauma-Focused Cognitive Behavioral Therapy (TFCBT) and are program designated with CBH for TFCBT? Or does it have to be agencies with less trauma experience?**

This program is not designed as an evidence-based program. This program is to enhance clinical practice as it relates to trauma-based interventions and trauma informed care. Whether you have more trauma experience or less, we encourage you to submit an application for the RFA.

- 2. Is there a telehealth component for client care?**

A telehealth component will be considered for trauma informed service delivery. Should telehealth be a need for agencies that are a part of the academy, we can address those concerns.

- 3. Does this apply to drug and alcohol outpatient?**

No. This RFA seeks applications from mental health outpatient providers.
