

- 1. Are the clients that would be on the supervisor and clinician caseload be new referrals (and would they come directly from CBH), or would we be able to pull from those currently in therapy (as many would benefit from this service)?**

Both. We anticipate that providers will already have members on their existing caseloads that could benefit from TF-CBT. There is no mandate that referrals be new.

- 2. Is there any type of certification for those who complete all training or is it CEUs only? Will the specific amount of CEUs be known or not until a provider qualifies?**

There is a certification offered through the Trauma-Focused Cognitive Behavioral Therapy National Therapist Certification Program. Clinicians will be responsible for tracking their own progress toward this certification and may choose to apply; however, CBH does not require this certification to be considered a PACTS clinician. [Click here](#) for more information on the certification program.

- 3. I see the 10-hour training is web-based. Is the 2-day training web-based or in-person?**

All trainings are web-based until further notice.
