

Discontinuation of Open Network

Community Behavioral Health (CBH) launched its [Open Network](#) initiative in October 2022, providing the opportunity for behavioral health providers offering identified levels of care to join the CBH Provider Network. This initiative allowed CBH to expand member access to needed behavioral health services as well as diversify the provider network to better meet members' behavioral health needs.

Effective September 1, 2025, CBH will be discontinuing Open Network. Applications submitted prior to this date will be considered and reviewed per the Open Network process. CBH remains committed to maintaining a provider network that effectively meets members' behavioral health needs, including ensuring sufficient capacity for needed behavioral health services. CBH will continue to regularly assess members' behavioral health needs and will issue Clinical Procurements as needed to expand specific behavioral health services or add new services to address identified gaps within the provider network.

Providers interested in joining the CBH provider network may view current [Clinical Procurement](#) opportunities listed on the CBH website.
