

Expansion of Ancillary (Lab) Service Provider

This notice is to inform providers that Labcorp is now an in-network provider of ancillary (lab) services.

To help improve access to services, CBH issued a [Request for Proposals \(RFP\)](#) for ancillary service providers in October 2024, and Labcorp was awarded. Now, members who are referred to lab services by CBH providers have the option of going to a Labcorp location.

Throughout Philadelphia County, Labcorp has 22 Patient Service Centers and eight in-office phlebotomy service sites located within Federally Qualified Health Clinics (FQHCs). To support members receiving ancillary services, [Labcorp's webpage](#) provides information regarding the types of lab services offered, hours of operation, walk-in hours, and scheduling availability at each of its locations.

Contact your assigned provider relations representative with your questions.
