

## **Behavioral Health Services Reporting Classification Chart (BHSRCC) Procedure Code Update**

CBH is issuing this Provider Notice in reference to [Provider Bulletin 23-10 BHSRCC Procedure Code Update](#) for H0034 and H0034 HK. CBH is in the process of adding a pricing modifier to all services listed below that have converted from a 15-minute unit of measure to an event. Providers will use a pricing modifier when serving a member with moderate to complex needs who historically exceeded a 15-minute visit. We are requesting that providers hold all claims for members with moderate to complex needs until provider contracts are updated with the pricing modifier that will pay at a higher rate.

The pricing modifier will be effective June 1, 2023. Providers will need to identify the claims for moderate to complex members that have already been submitted to CBH for payment. These claims will need to be reversed, then resubmitted using the pricing modifier to receive the higher reimbursement rate. Provider contract rates for the below services that are included in a current case rate will remain at \$0.

300	5	Medication Management
300	26	Clozaril Monitor & Eval
300	27	Clozapine Supp Svcs
