

CBT FOR KIDS

ASK FOR IT BY NAME: CBT

? What is CBT?

The way we view and think about situations influences how we feel emotionally and how we act. CBT helps people live the lives they want to live by learning and practicing new skills to challenge unhelpful patterns of thinking and reacting.

🧑 Is CBT right for me?

People living with the following may benefit from CBT:

- Anxiety
- Depression
- Personality disorders
- Psychotic disorders
- Eating concerns
- Problems sleeping

🏠 Core Components

- CBT is focused on the present, is time-limited, skill-focused, and problem-solving oriented.
- Treatment focuses on building new skills that lead to new ways of thinking, feeling, and reacting.
- Each session follows a similar pattern: check in, agenda setting, discussion of agenda items, summary, feedback, and practice skills outside of session

Techniques used in sessions include:

- ✓ Thought checking
- ✓ Behavioral activation
- ✓ Problem solving skills
- ✓ Relaxation
- ✓ In vivo exposure

📈 CBT for Kids

CBT can help children discover new ways of looking at things and how to respond differently in stressful situations. Through CBT children may learn more self-control, problem solving skills, new coping skills, and improve their self-image.

Don't Miss Out!

Call CBH Member Services at 888-545-2600 and ask for CBT.

THE EVIDENCE-BASED PRACTICE AND INNOVATION CENTER (EPIC)

Effective Practices that Support People with Behavioral Health Challenges

EVIDENCE-BASED PRACTICES: EBP

What are EBPs?

EBPs or Evidence-Based Practices are treatments supported by research that have been proven to help people thrive.

Why are EBPs important?

Just as doctor's offices look for the best treatments for physical health concerns, we want to do the same for behavioral and mental health concerns. EBPs provide hope to families by offering the most effective treatments.

Where can I find EBP providers?

Visit our website, DBHIDS.org/EPIC or call Member Services at 888-545-2600.
