

Medication Assisted Treatment (MAT): Capacity and Access Data Collection

CBH continues to monitor the Provider Network and support alignment with timely access standards for all levels of care. This Provider Notice is being issued to inform that beginning May 2024, CBH will require ASAM 2.1, ASAM 2.5, ASAM 3.1, ASAM 3.5, ASAM 3.7, ASAM 3.7 WM, ASAM 4.0, ASAM 4.0 WM and AIP Providers to complete a brief monthly survey indicating program census and capacity based on current staff complement.

Additionally, the survey will require the above noted ASAM levels of care providers and Acute Inpatient Providers to report Medication Assisted Treatment (MAT) forms, capacity and referral information. Surveys must be completed by the last day of each month.

For Providers that offer more than one service, CBH will be gathering this information on separate sections on the same [survey](#). Submitted data will be monitored for routine completion and for further assessment of adequacy of the CBH network. Operational challenges, including waitlists, closure, and staffing shortages, should continue to be reported via the [Provider Operational Change Form](#).

Monthly data will be collected on:

- ➔ Program census
- ➔ Program capacity
- ➔ Forms of MAT and referral plans for individuals requiring MAT

View [Provider Bulletin 21-12: Provider Access to Timely Treatment](#) for more information.
